

RISC-V Summit Europe: Industry Session Submission

This is a community conference focused on discussing innovative solutions in and around RISC-V. We encourage submissions which describe these innovative solutions, including use cases, that can be of interest to the community. We ask submissions refrain from being product and/or vendor sales pitches.

Dates to Remember

- **CFP Closes:** March 15th 2024
- **CFP Notifications:** April 29th 2024
- **Schedule Announcement:** May 3rd 2024
- **Event Dates:** June 24-28, 2024

Tracks and Suggested Topics

- HPC and Data Center
- Automotive
- Embedded/IoT (Device Boards, Sensors, etc.)
- AI/ML
- Mobile
- Solutions-Focused Case Studies (5G, Financials, Retail, etc.)
- Software and Ecosystem

Submission Types

- Session Presentation: 15 minutes

Submission Format

- **Speaker tagline - Your company, position, title - or everything combined**
- **Session title**
- **Session description (up to 2 pages)**

Requirements & Considerations

- Any hardware, platforms, tools, services, or products you are presenting need to be based on or supporting RISC-V open standards or collaboration processes. If you are sharing your “How” you developed a product or technology, please highlight any contributions and/or benefits from the use of open source and open collaboration software, hardware, and processes. Avoid sales or marketing pitches; these talks will be rejected if it appears they could take away from the integrity of our event. In our experience, these kinds of presentations are rarely well-received by our conference attendees. The RISC-V Summit covers a broad spectrum of activities including academic, research, commercial, open-source, and proprietary – all abstract submissions are considered on a merit and non-discrimination basis by the technical program committee made up of representatives across the full RISC-V community.

- RISC-V International is dedicated to providing a harassment-free experience for participants at all of our events. We encourage diversity in our speakers, and all presenters will be required to review and follow our [Code of Conduct](#).

Preparing to Submit Your Proposal

While it is not our intention to provide you with strict instructions on how to prepare your proposal, we hope you will take a moment to review the following guidelines that we have put together to help you prepare the best submission possible. To get started, here are four things that you should consider before submitting your proposal:

1. Is this a “how to” talk, telling the audience how something was/will be done, and not an overview of what you did?
2. What are the top two (2) things people will learn from this talk?
3. Why should YOU be the one to give this talk? You have a unique story. Tell it.

There are plenty of ways to give a presentation about projects and technologies without focusing on company-specific efforts. Remember the things to consider that we mentioned above when writing your proposal and think of ways to make it interesting for attendees while still letting you share your experiences, educate the community about an issue, or generate interest in a project.

First Time Submitting? Don't Feel Intimidated

RISC-V events are an excellent way to get to know the community and share your ideas and the work that you are doing. You do not need to be a chief architect or long-time industry pundit to submit a proposal, in fact, we strongly encourage first-time speakers to submit talks for all of our events.

Our events are working conferences intended for professional networking and collaboration in the RISC-V community and we work closely with our attendees, sponsors and speakers to help keep RISC-V events professional, welcoming, and friendly. If you have any questions on how to submit a proposal or the event in general, please contact andy@riscv.org.

CFP Questions?

If you have any questions regarding the CFP process, please contact us at andy@riscv.org.
