# LLVM Parallel Universe (openEuler, Since 2023)

Replacing GCC with LLVM for building openEuler.

“Parallel Universe”: Runs alongside the GNU version release.

## Progress:

- UEFI preview for RISC-V (64-core SG2042).
- Passed 10,000+ kernel tests.
- Validated 4,000+ packages with no critical LLVM issues.
- Slight performance gains.

**Future:** Stable releases & 6000+ packages & RVA23 profile
